

/*Experiment 1: installation, Environment setup and starting with C language

5. Write a C program to perform any four arithmetic operation on two variable. */

```
#include <stdio.h>
#include<conio.h>
int main()
{
printf("Name- Mahek Jayantilal Tilara\nSAP ID
-590025452\nCourse-BSC
CS\nBatchB1\n");
printf("\n-----\n");
int length,width;//declaration
printf("enter length = ");
scanf("%d",&length);printf("enter width = ");
scanf("%d",&width);
int parameter=0;
parameter = 2*( length + width );
printf("the parameter is = %d\n", parameter);
int area;
area = length * width;
printf("the area is = %d",area);
getch();
return 0;
}
```

Output:

```
C:\USERS\USER\DOWNLOADED\C-PROGRAM\M.EXE
Name- Mahek Jayantilal Tilara
SAP ID - 590025452
Course-BSC CS
BatchB1
-----
enter length = 10
enter width = 50
the parameter is = 120
the area is = 500
```
